

Calling All Single Ladies: Cincinnati, OH Tops List of Best Places to Live for Single Women

To celebrate National Singles Week, Owners.com identifies top 20 markets for single women based on affordability

ATLANTA, GA -- (Marketwired) -- 09/18/17 -- Owners.com, an innovative online real estate brokerage, today released data ranking the 20 best U.S. metropolitan statistical areas (MSAs) for single women to live. Cincinnati-Wilmington-Maysville, OH comes out on top, followed by Kansas City-Overland Park-Kansas City, MO-KS and Dallas-Fort Worth, TX-OK. Recent findings show that single female home buyers outnumber single male home buyers.¹ (Single women make up 17 percent of the national market and single men make up seven percent.)

Owners.com analyzed markets women might consider based on a variety of factors, including the percentage of single women homeowners and housing affordability, as well as market attributes like crime rates, access to public transportation, walkability and the cost of dinner for two. The Owners.com[®] study then filtered out MSAs where women earn below-average incomes.

Reviewing this group, the study uncovered key insights on the top 10 markets:

- 1 They offer women affordable housing:² The top 10 markets are 70 percent more affordable than the next 10 markets, which include distinctively expensive markets like New York City, Los Angeles and San Francisco.
- 1 They offer affordable dining options: In the top 10 markets, the average cost of dinner for two at a three-plus star restaurant is 18.6 percent less expensive than the next 10 markets.
- 1 They have, on average, 5.1 percent more single women homeowners than the next 10 markets, suggesting that affordability is a measurable factor when single women determine where to purchase a home.

"There is a noticeable shift toward more single women entering the real estate market, particularly given lower unemployment rates, rising incomes and the value placed on home ownership," said Phil Karp, senior manager of brokerage services at Owners.com. "Housing inventory remains low and costs are high throughout the country. Savvy buyers should seek modernized brokerage models that not only offer rebates at close, but also provide data to support smarter, data-informed purchase decisions."

Methodology

[Owners.com](#) identified all MSAs with over one million people. Once these MSAs were identified, any MSA with below-average income for females (< \$39,586) were cut. Based on the remaining MSAs, markets with the lowest percentage of female homeowners were eliminated. The final data cut the bottom five markets with the lowest home values, and the top 20 markets were ranked by average home price.

[Owners.com](#) used six metrics to identify and rank the top 20 markets for single women to live in the U.S., which were then ordered by affordability. The MSAs were measured based on six key metrics, which were weighted and summed, and a score scaling was applied to the data. The weights for each metric are as follows:

- | [Percentage of Single Women Homeowners](#): 25 percent of score
- | [Housing Affordability](#) (according to single female income): 20 percent
- | [Median Female Income](#): 15 percent
- | [Violent Crime Rate](#): 15 percent
- | [Average Cost of Dinner for Two](#): 15 percent
- | [Average of Walkability and Transit Scores](#): 10 percent
